1985

- Top-ranking computing power needed for competitive science in Germany !

Universität Bielefeld Postfach 8640 4800 Bielefeld 1

Universitätsstraße

Ruf (0521) 106-1

Durchwahl 106- 2990

Telex 932362 unibi

An den Bundesminister
für Forschung und Technologie
Herrn Dr. H. Riesenhuber

Heinemannstraße 2
5300 Bonn 2

Bielefeld, den 5. Juni 1985

⋮

Prof. Dr. K. Binder

Institut für Theoretische Physik
Universität Mainz
Ruf an das Supercomputer Research Institute
Florida State University
Tallahassee / Florida

Prof. Dr. H. Satz

Fakultät für Physik
Universität Bielefeld
Ruf an das Brookhaven National Laboratory
Upton, New York

Prof. Dr. J. Zabolitzky

Institut für Theoretische Physik
Universität Köln
Ruf an das Supercomputer Institute
University of Minnesota
Minneapolis, Minnesota

1985

- Top-ranking computing power needed for competitive science in Germany !
- Instrumental for getting political and institutional support:

Brilliant lobbyist for computational science,
Prof. Horst Rollnik

Far-sighted director of computer facilities
in Jülich, Prof. Friedel Hoßfeld

1987

- Cooperation agreement by KFA (now FZJ), DESY and GMD:
The first German supercomputer center (Höchstleistungsrechenzentrum, HLRZ) was born.

Mission of the HLRZ / NIC:

- *Independent* interface between operator of top level computers and a nationwide academic user community:
 - Scientific Council
 - Peer Review Board

Chairpersons of Scientific Council

Horst Rollnik
1987 - 1999

Dietrich Wolf
2000 – 2005

Gernot Münster
2006 – 2011

Kurt Binder
2012 – 2017

Marcus Müller
2018 - 2023

Mission of the HLRZ / NIC:

- *Independent* interface between operator of top level computers and a nationwide academic user community:
 - Scientific Council
 - Peer Review Board
- HPC – community formation by
 - User support
 - User – symposia
 - Topical workshops
- Research groups for international visibility

Detail of Prof. Giovanni Ciccotti's bookshelf in Rome

Mission of the HLRZ / NIC:

- *Independent* interface between operator of top level computers and a nationwide academic user community:
 - Scientific Council
 - Peer Review Board
- HPC – community formation by
 - User support
 - NIC – symposia
 - Topical workshops
- Research groups for international visibility

HöchstLeistungsRechenZentrum

1998

- GMD terminates its HLRZ-involvement and becomes a Fraunhofer institute.
- DESY and FZJ renew their cooperation agreement and rename HLRZ into NIC.

Sculpture by
Gabriella Bollobas

2004

- Prof. Thomas Lippert new director of Jülich Supercomputing Center (JSC)

2006

- GSI joins NIC.

The Fruit

- Tier-0 partnership: Gauß Center for Supercomputing (GCS)
- European outreach
- Training for exascale readiness
- Novel supercomputer concepts
- Scientific highlights

Tier-0 Partners – Gauß Center for Supercomputing

1995

- Inception of the High Performance Computing Center Stuttgart (HLRS).

1999

- Leibnitz Supercomputer Center München (LRZ) becomes the third national supercomputer center.
- “Congregation“ (H. Rollnik): Regular meetings of the three centers, coordination of innovation spiral.

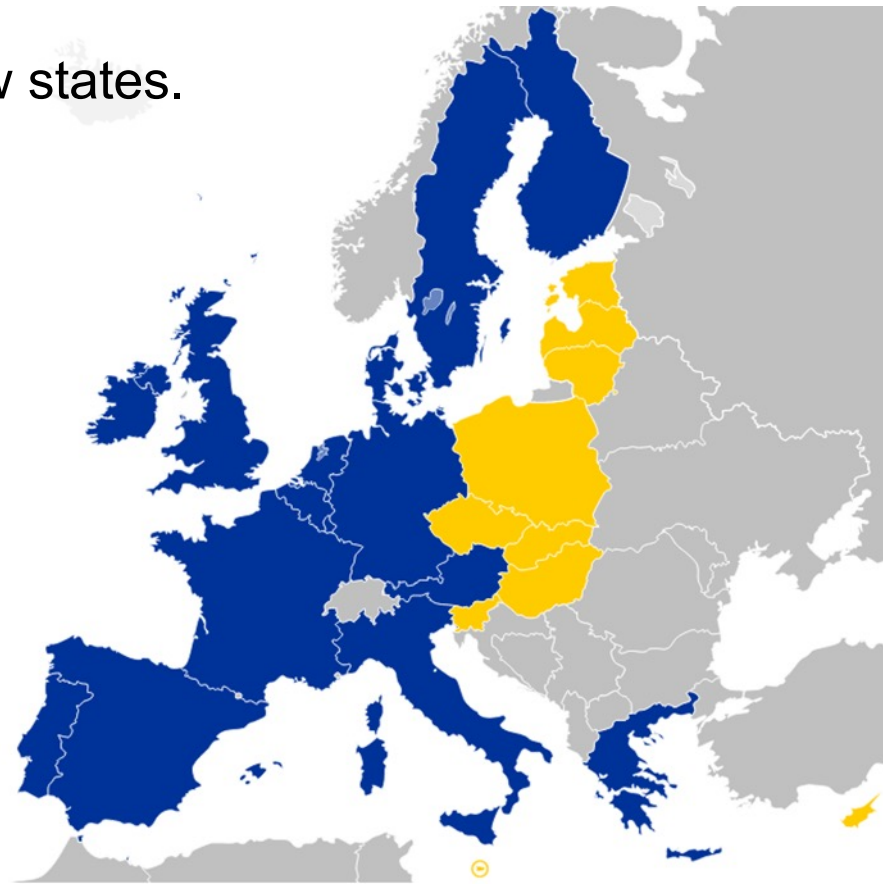

2007

- Merger of the three centers into a single German Supercomputer Center, GCS:
 - Most powerful supercomputing infrastructure in Europe.
 - Coordinated peer review of Large Scale Projects.
 - Common online portal for managing proposals, JARDS.

European outreach

2004

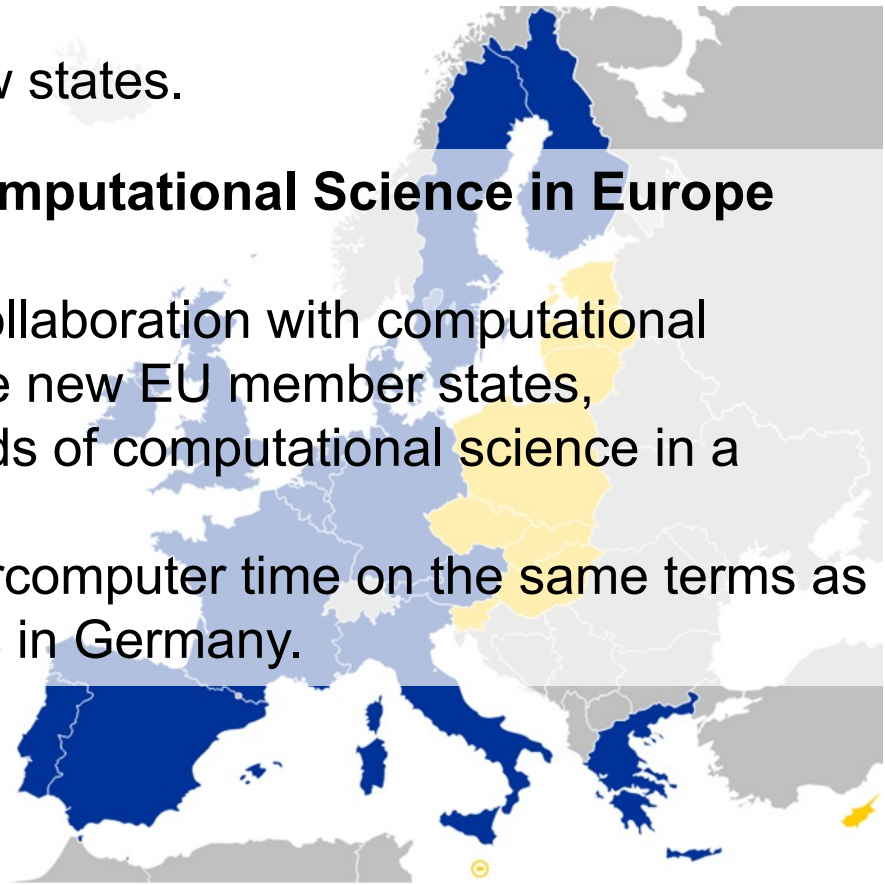

- EU grows by 10 new states.

2004

2006

- EU grows by 10 new states.
- **Strengthening Computational Science in Europe Initiative** to
 - advance the collaboration with computational scientists of the new EU member states,
 - define the needs of computational science in a larger Europe,
 - offer free supercomputer time on the same terms as for researchers in Germany.

2004

2006

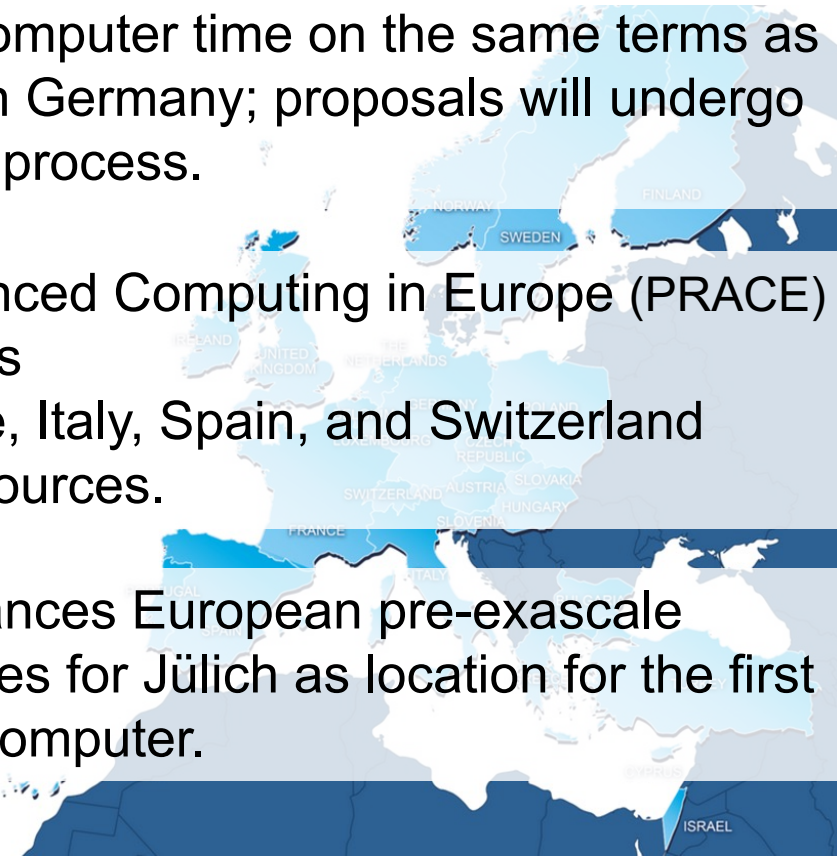

- EU grows by 10 new states
- **Strengthening Computational Science in Europe**
NIC-Initiative to
 - advance the collaboration with computational scientists of the new EU member states,
 - define the needs of computational science in a larger Europe,
 - offer free supercomputer time on the same terms as for researchers in Germany; proposals will undergo a peer reviewing process.

2010

- **Partnership for Advanced Computing in Europe (PRACE)**
 - 25 member states
 - Germany, France, Italy, Spain, and Switzerland provide HPC-resources.

2022

- **EuroHPC: EU co-finances European pre-exascale computers and decides for Jülich as location for the first European exascale computer.**

Training for exascale readiness

- Early Access programs
- Simulation- and Data-Labs
- Workshops
- High-Q Club

2017

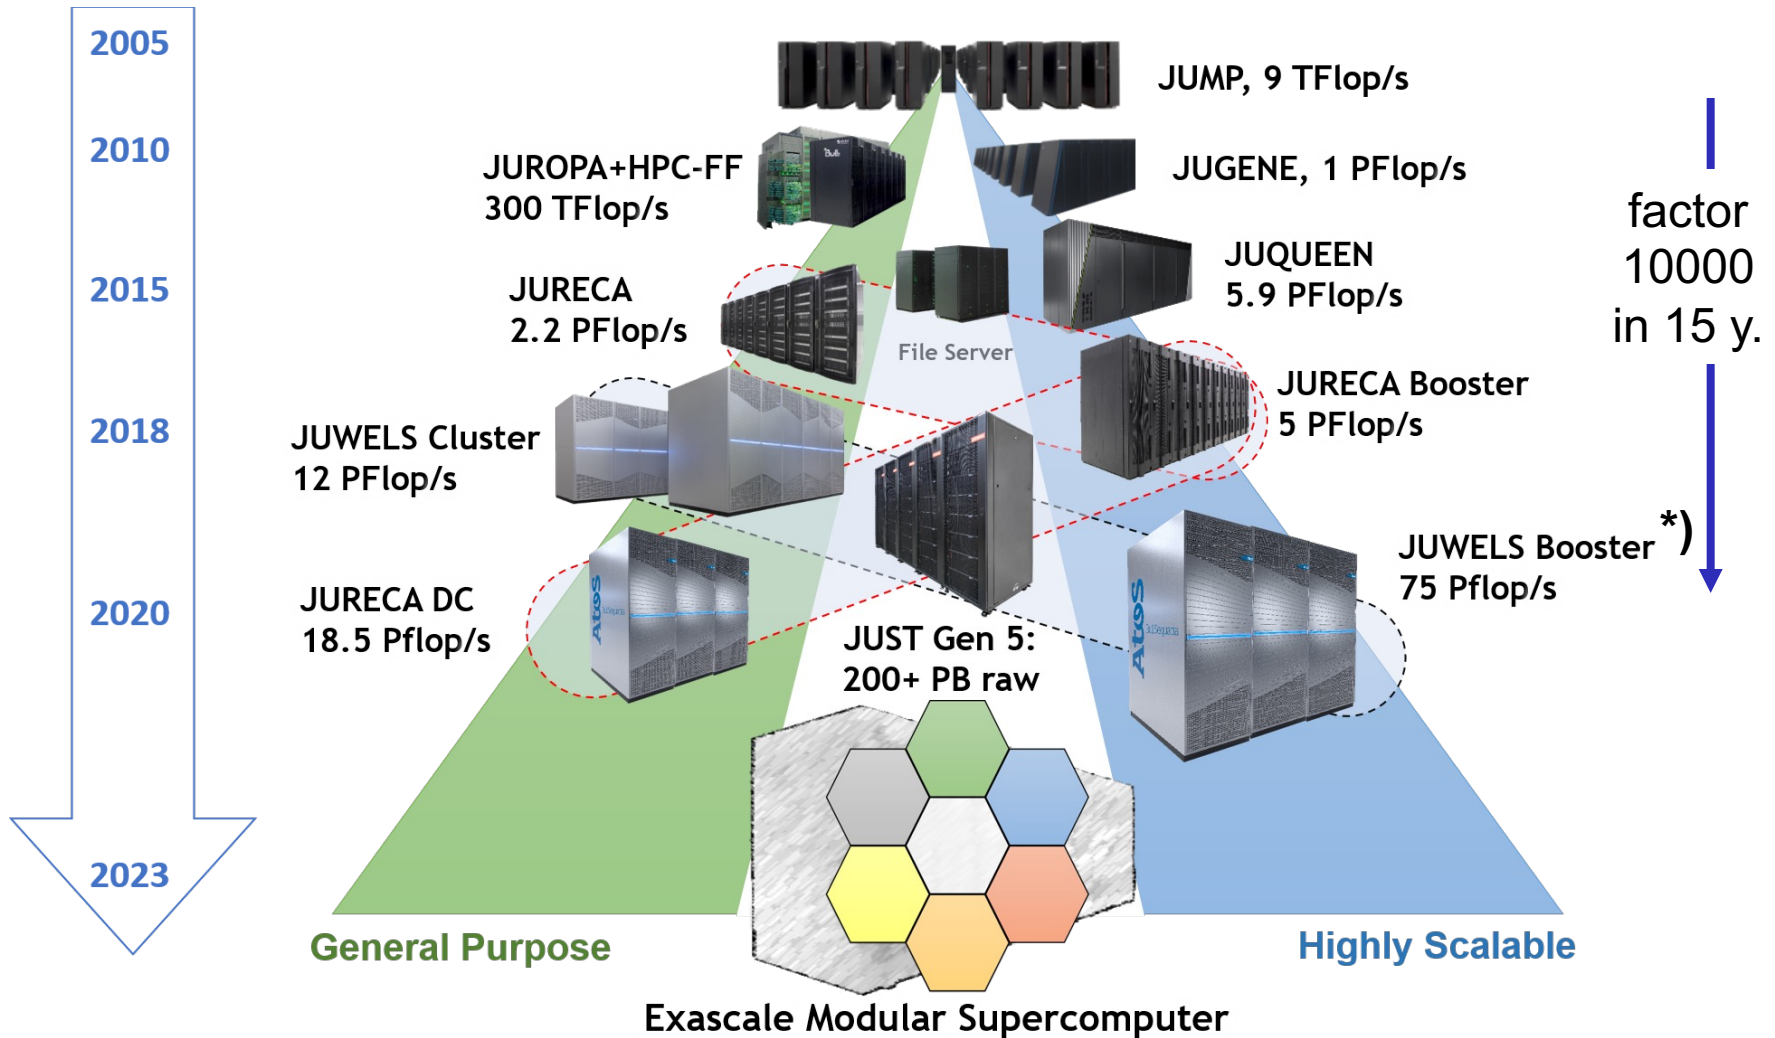

High-Q Club:

- 32 application codes demonstrating extreme scaling on JUQUEEN (IBM Blue Gene/Q, 458752 cores)
- Diverse fields: Fluid dynamics, earth system research, astrophysics, quantum mechanics of solids, plasma physics, lattice QCD with dynamic fermions, molecular dynamics, ...

D. Brommel et al.,
Supercomputing Frontiers and Innovations: an International Journal **5** (2018) 59;
DOI: 10.14529/jsfi180104

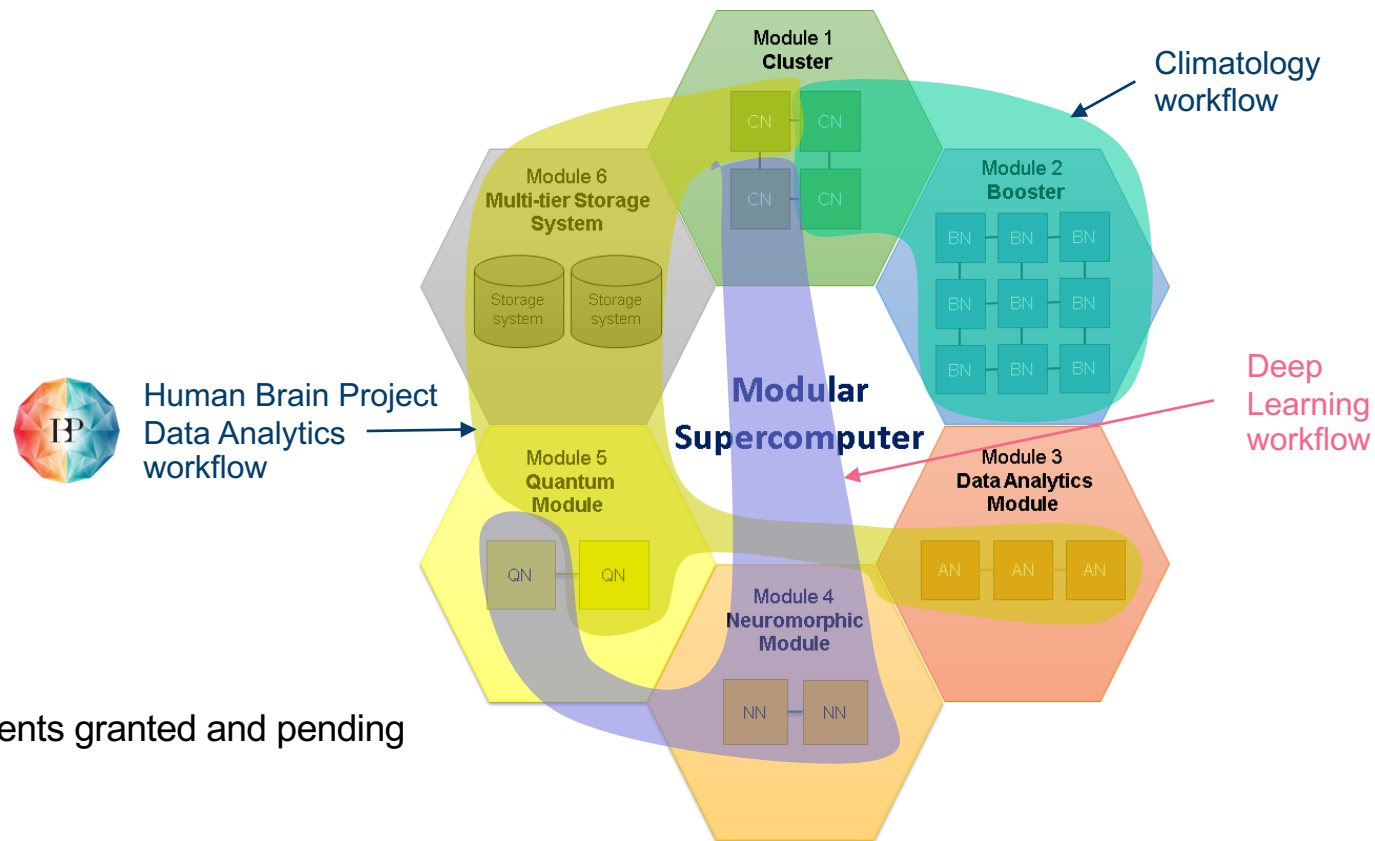

**Development of novel supercomputer concepts:
green, quantum, modular**

(DUAL) hardware strategy at JSC

*) Highest efficiency (Gflops/Watts) among the 150 top supercomputers worldwide.

... and Evolution to a Modular supercomputing architecture
